INTEGRATED MEASURING CENTER TABLE

Aluminum 3/8" jig plate

Jig plate offers excellent flatness. The material will never rust.

Every system includes a 1/4" thick elephant bark black rubber mat that absorbs laser light and part shock. It also provides excellent grip to keep the part in place.

Large monitor

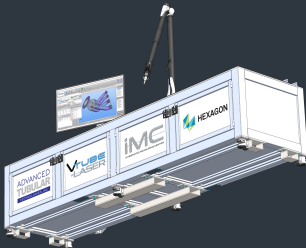

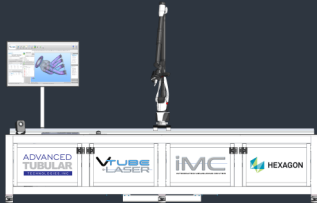

Uninterruptable Power Supply

TRAX

Lockable doors with handles

Shelves with ball bearing drawer slides

Non-marking leveling casters

INTEGRATED MEASURING CENTER TABLE

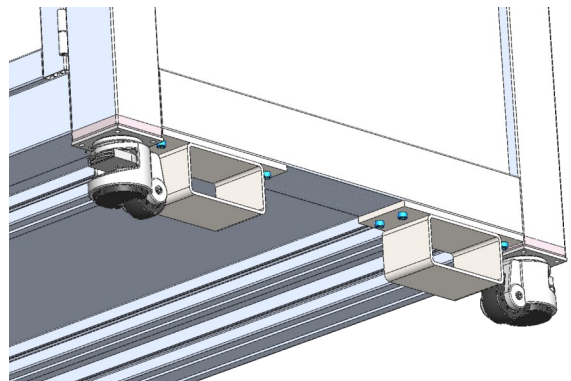

Finite Element Analysis

We use FEA (Finite Element Analysis) tests to ensure that the tables are designed for minimum deflection under the weight and torque of the mounted arm.

Optional fork lift pockets are available for the iMC tables.
