VTUBEiMC

INTEGRATED MEASURING CENTER TABLE

VTube-iMC

The complete plug-and-play measuring system designed specifically for tube fabricators.

- Easy-to-learn tube measuring software.
- Measure super long tubes using the world-class HEXAGON RA8 scan arm system.
- Connect up to 100 benders at no extra charge.
- Track tube metrics in real-time and in permanent data storage.
- Add other scanning software to measure any shape—not just tubes.

INTEGRATED MEASURING CENTER TABLE

Aluminum jig plate

Large monitor

Uninterruptable
Power Supply

Jig plate offers excellent flatness. The material will never rust.

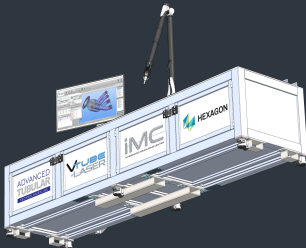

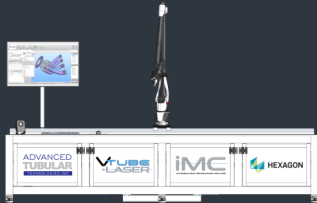

Every system includes a 1/4" thick elephant bark black rubber mat that absorbs laser light and part shock. It also provides excellent grip to keep the part in place.

TRAX

Lockable doors
with handles

Shelves with ball
bearing drawer
slides

Non-marking
leveling casters

INTEGRATED MEASURING CENTER TABLE

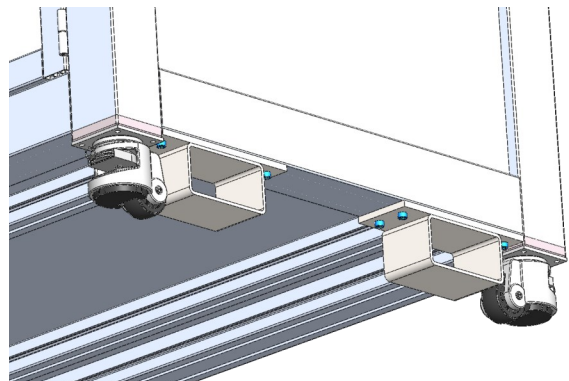

Finite Element Analysis

We use FEA (Finite Element Analysis) tests to ensure that the tables are designed for minimum deflection under the weight and torque of the mounted arm.

Optional fork lift pockets are available for the tables (additional charge).
